

MUHAMMAD FARHAN

Full Stack Web Developer • Software Engineer
+92 339 0490934 • itsfarhan259@gmail.com • Kohat, Pakistan

PROFESSIONAL SUMMARY

Full Stack Web Developer with hands-on experience building responsive, scalable, and user-focused web applications across the frontend and backend. Skilled in React.js, Next.js, Vue.js, TypeScript, Node.js, Express.js, Python, MongoDB, MySQL, Firebase, and REST API development. Experienced in translating business requirements and UI/UX designs into production-ready applications, integrating APIs, managing databases, implementing authentication, and deploying applications to VPS and AWS environments.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Vue.js, Tailwind CSS, Bootstrap 5

Backend: Node.js, Express.js, Python, REST APIs, WebSockets (Socket.io)

Databases & Cloud: MongoDB, MySQL, PostgreSQL, Firebase, Firestore

DevOps & Tools: Git, GitHub, VPS, AWS, Postman, Vercel, Deployment & Hosting

PROFESSIONAL EXPERIENCE

Freelance Full Stack Web Developer | Upwork & Independent Client Projects

Apr 2025 – Present

- Developing tailored full-stack web applications for global clients using React.js, Next.js, Node.js, and Express.js.
- Designing, developing, and integrating custom RESTful APIs, backend microservices, and database schemas (MongoDB/MySQL).
- Implementing secure user authentication workflows, payment gateways, and responsive frontend component architectures.
- Deploying and maintaining client applications on AWS and VPS environments with continuous performance optimization.

Full Stack Web Developer | DEVK SYSTEM

Nov 2024 – Mar 2025

- Developed and maintained full-stack web applications using React.js, JavaScript, Node.js, Express.js, and MongoDB.
- Built responsive frontend interfaces and RESTful backend APIs, integrating frontend components with database-driven services.
- Implemented reusable components, authentication workflows, API integrations, and performance-focused solutions.
- Collaborated with team members to deliver reliable, maintainable, and user-friendly web applications.

Frontend Web Developer | NIC (National Incubation Center KUST)

May 2024 – Oct 2024

- Developed responsive web applications for startup and incubation initiatives using modern frontend technologies.
- Translated UI/UX designs and business requirements into clean, accessible, and user-friendly web interfaces.
- Optimized interfaces for responsiveness, cross-browser compatibility, usability, and maintainability.

Frontend Web Developer | Web Development Projects

Jul 2023 – Apr 2024

- Developed responsive, user-friendly frontend web interfaces using React.js, JavaScript, HTML5, and CSS3.
- Gained foundational backend experience, working with RESTful API structures, server-side data handling, and basic database operations.
- Integrated frontend components with backend services while implementing responsive design principles and cross-browser support.

Frontend Intern | Brandora

Jan 2023 – Jun 2023

- Developed responsive web interfaces using React.js, JavaScript, HTML5, and CSS3.
- Applied frontend best practices for responsive design, cross-browser compatibility, and performance optimization.
- Worked closely with UI/UX designers to translate wireframes and design concepts into functional web pages.

KEY PROJECTS

Fleet Management & Operations System (Web)

Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, REST APIs, JWT Authentication

- Architected a full-stack web fleet management platform designed to centralize vehicle records, driver profiles, fuel logs, and trip schedules.
- Implemented role-based access control (RBAC), document expiry alerts, maintenance history logs, and operational analytics dashboards.
- Designed automated notification workflows for preventative vehicle servicing, document renewals, and operational driver assignments.
- Developed and documented RESTful API endpoints in Postman, ensuring fast database queries and efficient front-end data synchronization.
- Built a responsive React.js web admin portal allowing operations staff to monitor active trips and generate fleet performance reports.

FixRight — Home Services Marketplace Admin Dashboard (Web)

Tech Stack: Firebase, Firestore, JavaScript, HTML5, CSS3, Web App, Real-Time Database

- Developed a real-time marketplace web admin dashboard providing centralized control over seller KYC verification and CNIC document approvals.
- Integrated custom commission rule configurations, financial ledger tracking, seller balances, and live job/bid monitoring interfaces.
- Implemented granular administrative role permissions separating customer support, compliance, and dispute resolution staff.
- Utilized Firestore real-time data listeners to ensure immediate live updates across platform user records and active service bookings.
- Designed an intuitive, responsive management interface allowing platform staff to process payouts and handle customer disputes.

Car Rental Management System (Web)

Tech Stack: React.js, Node.js, Express.js, PostgreSQL, JWT Authentication, REST APIs

- Built a production-grade car rental platform for managing vehicle inventory, customer profiles, reservation schedules, and billing.
- Designed structured PostgreSQL database schemas with foreign key relationships, transactional safety, and query optimization.
- Implemented dynamic booking conflict validation logic and dynamic price calculation algorithms on the server side.
- Constructed an interactive React web dashboard featuring operational analytics, reservation calendars, and automated invoice tools.
- Secured administrative API endpoints with JWT authentication and middleware input sanitization.

MeetIN — Real-Time Chat & Communication Platform (Web)

Tech Stack: Next.js, MongoDB, Socket.io, Node.js, Vercel, WebSockets, REST APIs

- Designed a real-time web messaging application supporting instant user-to-user communication powered by WebSockets and Socket.io.
- Built active user presence tracking, online/offline status updates, contact list management, and rich media attachment sharing.

- Implemented typing indicator events, message delivery status receipts, and full chat history search using MongoDB indexes.
- Deployed the application across modern server environments, ensuring low-latency connection handling and stability.
- Developed clean, mobile-responsive chat UI components using Next.js and modular CSS frameworks.

SatisNation — Civil Data Analytics Platform (Web)

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT Authentication, REST APIs

- Developed a full-stack civil data analytics platform designed to process, analyze, and visualize complex civic datasets.
- Built interactive React data visualization dashboards featuring filterable charts, trend summaries, and dataset management tools.
- Engineered backend aggregation pipelines in MongoDB to handle multi-criteria filtering and structured civic survey data processing.
- Implemented secure user registration, profile management, and role-restricted access across administrative reporting tools.
- Designed automated report export utilities enabling researchers and analysts to download custom data summaries in standard formats.

EDUCATION

BS Software Engineering — Kohat University of Science & Technology (KUST) | 2023 – 2027 (7th Semester)

FSc Pre-Engineering — Fazaia Inter College Kohat (FIC Kohat) | 2021 – 2023
